SOLUTIONS IN THE LAND

Chloe is from Sarasota, FL. currently living in Kenosha, WI. She is an advocate for restorative agriculture and food systems. Her knowledge of farming has allowed her to better understand and implement sustainable organic practices across multiple spectrums of farming and agriculture.

Currently, Chloe is the project coordinator for Solutions in the Land, LLC, a for-profit consulting firm offering whole-system farm planning services in both urban and rural environments. Current projects include McHenry County 2050 Comprehensive County Plan, water infiltration trials with The Mulch Center, and Somers Farm and Prairie.

Skill Set

Microsoft Excel, Word, PowerPoint, Adobe, Whole-System Farm Planning

Professional Summary

Creating farm plans: Engaging in agricultural and land use planning for land owners. Experience with a process of site investigation, assessment of crop suitability, identifying conservation practices and agriculture resources. Assessing the environmental and social impact of a site on the surrounding region

Client Relations: Participating in client intake and assessing needs. Communication. Content creation including reports, videos, and other supporting documents. Developing and improving the layout and formatting of business documents and media. Interpret agriculture research and analysis for application on the client's site.
