

SOLUTIONS IN THE LAND

Jasper County, Iowa

In 2019, Jasper County Board of Supervisors selected Snyder & Associates of Des Moines to craft a comprehensive county plan. Solutions in the Land was sought out by Snyder & Associates for the agriculture portion of the plan.

Solutions in the land facilitated three agriculture forums with Jasper County farmers, ag businesses, and other stakeholders to develop strategies to bring positive economic and social changes while protecting the environment.

As a result farmers felt they needed more support and better communication between the agriculture community and county government in addition to an increase in available educational resources for farming and non-farming communities.

Plans were put into place to support a better relationship between farmers and the community. Together, Solutions in the Land and Jasper County initiated a more sustainable environment for both society and agriculture for the next 20 years.
